

# Paint with Purpose & Starting Point

## Entrepreneurial Leadership

We developed a partnership with Sherwin-Williams to help them solve a problem and benefit non-profits in our community. This led to an even bigger opportunity with one of our community partners.

## Innovation

It started with paint, but led to relationships with young single mothers in our community who needed help with budgeting, resumes, and providing for their young families.

## Use of Business Principles

Educating these women to help them with their personal finances and job search allows them to prosper and in turn has a positive effect on their children. By providing these educational opportunities, our goal is to support gender equality and work toward reducing poverty for these women.

## Sustainable Positive Impact

We look forward to seeing a positive, long-term benefit for the women we are serving and their families. Through our partnership with one for-profit business (Sherwin-Williams), we are seeing doors open to serve other non-profits and their clients in our community.

# ANCHORED

## Annual Report 2022-2023

## Sleep in Heavenly Peace

We improved the logistics for this non-profit, scheduling bed deliveries every week with families in our community. We continuously enhance our system and improve processes. This year we were able to provide 79 children with a reliable, safe place to sleep.

## Sustain For Change

This sustainability-focused project was established to reduce plastic waste on our campus. Our team collected plastic to make ecobricks. We have produced 120 bricks, preventing 52 pounds of non-recyclable plastic from ending up in a landfill.

## Operation Celebration

We employed entrepreneurial leadership by targeting two unique audiences: Twisted Cupcake, a local bakery, and Miller Nursing Home. We provided monthly birthday parties to nursing home residents who would otherwise not have people around to celebrate.

## Refresh Upcycling

This new initiative was established to sustainably provide professional clothing to our community. We have written a business plan to present this start-up to an entrepreneurship pitch competition for funding with a plan to make this an ongoing business on our campus.

# Food Recovery Network

## Entrepreneurial Leadership

We recognized an important need: 11% of individuals in our community experience food insecurity while thousands of pounds of food are being thrown away in our cafeteria.

## Innovation

We established a partnership with our local Salvation Army to support their hot lunch program. Funding can be scarce for non-profits who are attempting to meet the needs of the poorest among us. When we learned that our Salvation Army needed food, we committed to be part of the solution.

## Use of Business Principles

This has been an entrepreneurial endeavor, developing community partners, managing logistics, and rolling up our sleeves to do the work. We have recovered, weighed food, applied for grant money, purchased equipment, and built relationships.

## Sustainable Positive Impact

Since the inception of our Food Recovery Network chapter in 2017, we have reliably provided over 25,000 meals to people in need. In this year alone, we recovered 3,200 pounds of food.
